## The first snow comes to Bormio, work in progress for the world cup event

The first real autumnal low-pressure area has brought snow in Bormio, where the DH and Alpine Combined Men's World Cup races will take place on December 28 and 29. The white mantle covers the slope up to Bormio town (1230 m. asl), but in the upper part the low-pressure area was a strong one, with 50 cm above 2500 m. and 10 cm in Bormio 2000.

It is a good start, it also gives the opportunity to start using the new snow guns up to Bormio 2000. In the meanwhile, the installation of the security nets keeps going: the type A have already been placed in the upper part of the piste, while in the lower part work is in progress.
